Custom Cabinets

Häcker
kitchen.germanMade.

Version 11/2022

General

- Häcker cabinets are highly customizable
- Custom width, height and depth are possible (surcharge)
→ Important to note that we generally reduce sizes, not extend them
- We can change the layout of cabinets by adding drawers, doors, internal drawers, flap doors, fixed panels or lift-up doors
- Depth of drawers can be reduced following our standard depths 35cm (13.8"), 46cm (18") and 56cm (22") (especially important for downdraft solutions)
- Drawers of sink cabinets can have wooden back panels (as compared to metal ones) so that they can be cut out on site to fit plumbing
- Cabinets can be customized to fit a sloping roof

General

- Pricing of custom cabinet depends on changes
- MP-HS1 for small changes such as pinning doors etc.
- Completely new pricing for substantial changes such as adding fronts etc.
- For quoting purposes, please use these surcharges
- Add more surcharges rather than too few

	Reduction of carcass width	Reduction of carcass height	Reduction of carcass depth
Base units	MP-USB 191 \$	MP-USH 191 \$	MP-UST 135 \$
Wall units/worktop wall units	MP-OSB 191 \$	MP-OSH 191 \$	MP-OST 135 \$
Tall units	MP-HSB 217 \$	MP-HSH 217 \$	MP-HST 161 \$
Additional surcharges for...			
Base/wall/tall units	Order code/order number		
Unassembled (This article is only for single units, not for complete kitchens)	MP-ZER		68 \$
Fitting of additional equipment into the carcass: per installation (installable articles see  icon) (Assembly of merchandise articles on enquiry)	MP-MON		68 \$
Continuous shelf drillings for carcass	MP-DULO		88 \$
Surcharge for special width for pull-outs and drawers per piece. Internal pull-outs/drawers not available	MP-BRAZ		183 \$
Surcharge for height reduction for front fillers	MP-HKPA		68 \$
Surcharge for height extension for front fillers (up to max. 150 cm)	MP-HEAP		68 \$
Base units			
Corner base units variable	MP-VARIO		68 \$
Base unit with parallel hinging	MP-UAP		168 \$
Extension of carcass side for base units variable in depth from 57.5 up to 66 cm	MP-STU		136 \$
Corner notch on base unit	MP-UWA		298 \$
Modification of base unit swapping of front positions joining of doors, no integration of additional fronts* swapping of drawers with pull-outs modification of drawer or pull-out depth up to max. 56 cm / 46 cm	MP-HS1		117 \$

Limitations

- No custom widths possible in combination with:
 - shaker & glass doors (also height)
 - internal drawers/roll-outs (because of metal front panel)
 - trash cans (trash cans not available in custom width)
 - Tipmatic (push-to-open option for drawers)
 - long line handles (because we have no equipment to cut metal)

Bar handle system B 615

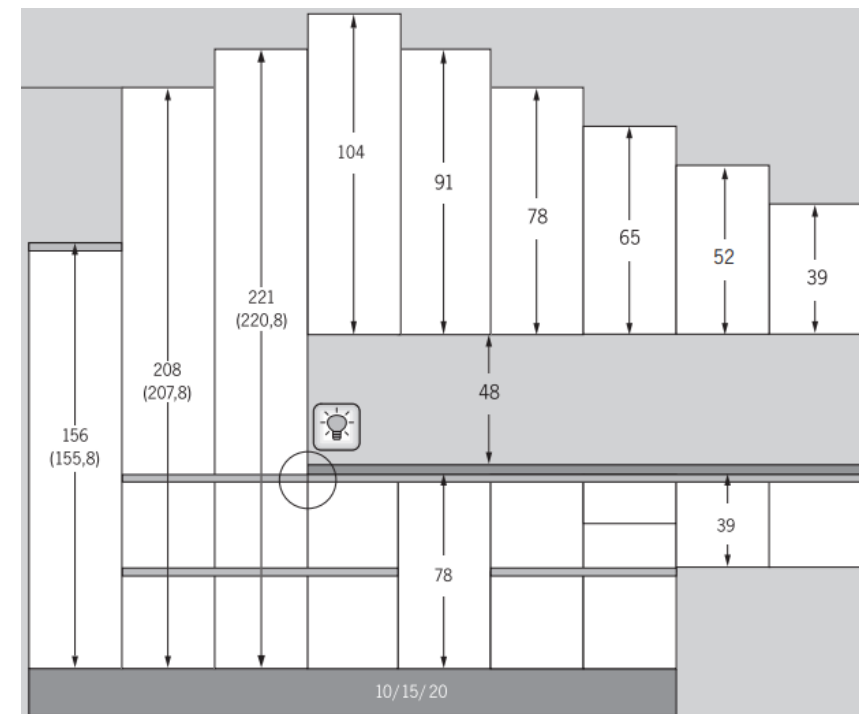

Bar handle system B 550

- bar handles are possible when supplied separately (closest match to custom width/height will be supplied)

Limitations

- We cannot supply two different fronts for one cabinet, front will have to be ordered separately and switched out on site
→ a lot of workarounds to make custom solutions happen
- Corner cabinets cannot be ordered with piano-hinge doors (not available with us)
- Wall cabinets can be extended in depth but will then have no hanging rail (liability)
- Cut-out positions for channel handles on ART cabinets are fixed and cannot be moved

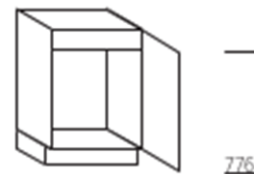

Inch-Size Cabinets

Häcker
kitchen.germanMade.

General - Sinks

- Standard widths (metric sizes) but 24" (61cm) deep to fit American sinks
- Our standard depth 22 1/16" (56cm) not deep enough, faucet collides with back panel
- Also available in custom widths
- Can be identified by the letter ,I' in the order number

Sink base unit
1 door
1 internal panel
1 back panel

776

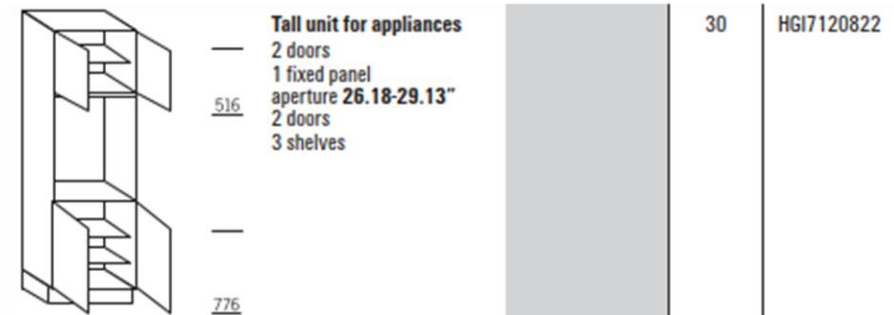

23.62

USI607803

General - Appliances

- 30"/24" wide and 24" deep appliance cabinets (both tall and base) available to fit American appliances
 - Can be identified by the letter ,I' in the order number
 - Also available in custom widths
 - 24" deep top boxes for fridges available (no hanging rail or channel handle)
 - Are made from different parts than standard European appliance cabinets
- e.g. shelves have more dowels to hold heavier American appliances
- this causes limitations

Limitations

- Only available shaker doors in inch sizes are AV3030, AV5035, AV5045, AV6055

- Inch sizes are considered custom widths so some before mentioned limitations apply (no glass doors, internal drawers)
- Not available with finished (lacquered, veneer) cabinet sides due to depth (management decision to not take up more storage capacity)
→ side panel required
- 30" cabinets not available with vertical channel because cabinets >23 5/8" (60cm) have two doors
