Mounting parts: **72 titanium**

Worktop profile: **G460 stone with mitred edge 4 cm**

Global Styles

Insofar as orders refer to a colour shade according to the RAL colour guide, we expressly point out that the colours and gloss levels shown there only serve as a rough guide for determining the desired colour shade. This does not constitute a binding agreement on quality. The representation of colour and gloss level on the RAL colour fan refers to an application on the specific material surface to which it has been applied. Due to the use of different material surfaces to which the paint selected according to the RAL colour guide is applied, deviations may occur with regard to both the colour shade and the degree of gloss. This applies in particular to the lacquering of woods and priming papers. Such deviations do not constitute a material defect.

Contains PB or MDF - TSCA Title VI compliant FR89874 - CARB 2 compliant CCR93120.2(a)

Regarding the load securing we refer to the StVZO §§30; 31 as well as

- You will find the **molding** (crown, toe-kick etc.) and **channel handle at the end of the confirmation**
- **Sundries (start with 'BP')** are also at the end of the confirmation. These parts don't have to be ordered, they automatically come with the order (such as cabinet feet, end caps for channel handle etc.)
- **Accessories** like cutlery trays are usually confirmed right after the cabinet that they are meant for

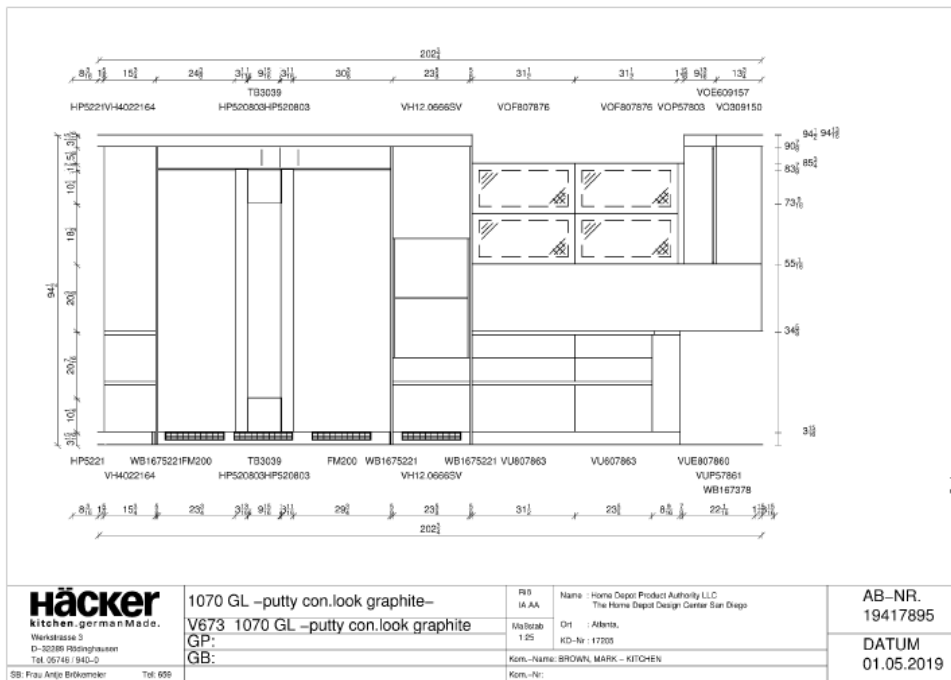

# Florplan

- The floorplan shows the position numbers
- The order of the position numbers is NOT random
- We usually confirm all items from **left to right**
- Starting with the base- and tall cabinets, then upper cabinets
- **Accessories are not shown** on the drawing

# Elevations

- The elevations show **item codes** and **exact measurements** for each individual cabinet
